OBJECTIVE

Computer Engineering student seeking a Summer 2027 internship in software engineering, AI/ML, embedded systems, or data engineering within semiconductor, intelligent-device, industrial technology, or advanced manufacturing environments. Eager to apply Python, C/C++, machine learning, sensor-data analysis, automation, and full-stack development skills to build reliable solutions with measurable impact.

EDUCATION

Bachelor of Science in Computer Engineering

Iowa State University | Ames, Iowa

July 2026 - May 2028

Transfer GPA: 3.97 / 4.00

Bachelor of Technology in Computer Science

Nirma University | Ahmedabad, Gujarat, India

July 2024 - May 2026

CGPA: 8.78 / 10.00

EXPERIENCE

AI/ML Analyst - Digital Systems

2026 - Present

Savita Synthetics & Pickwell Textile Machinery | Surat, Gujarat, India

- **Applied ML:** Designed and trained a predictive-maintenance model on live loom sensor data using Python, Pandas, NumPy, and scikit-learn; achieved 85% prediction accuracy and contributed to a reported 78% reduction in unplanned loom breakdowns.
- **Automation:** Built a Python + ReportLab pipeline to auto-generate branded PDF product catalogs across 6 fabric lines, reducing turnaround from 3 hours to 15 minutes per catalog.

Web Development Intern

December 2025

Doris Infotech | Surat, Gujarat, India

- **Full-Stack Development:** Built and debugged features across front-end, back-end, and database layers in a live production codebase; delivered tested UI components on deadline during a focused one-month sprint.
- **Requirements to Delivery:** Translated technical requirements and stakeholder needs into functional, tested web components.

Freelance Web Developer

2025 - Present

Independent Clients (Multiple Businesses) | Surat, Gujarat, India

- **End-to-End Ownership:** Designed, built, and deployed custom websites for multiple small-business clients, owning requirements, implementation, launch, hosting, and basic SEO/analytics setup.

PROJECTS

LoomSense - Predictive Maintenance ML System — *Python, Pandas, NumPy, scikit-learn, Matplotlib*

- Engineered an end-to-end predictive-maintenance pipeline for real waterjet loom sensor data — data cleaning, feature engineering, model training, and failure prediction — achieving 85% prediction accuracy and contributing to a 78% reduction in unplanned loom breakdowns.

Family AI Assistant — *Next.js, TypeScript, PostgreSQL, Supabase, OpenAI API*

- Building a private, voice-enabled AI assistant that retrieves family relationships, events, and memories from a structured PostgreSQL knowledge base to generate context-aware, conversational responses.
- Integrating OpenAI models with retrieval-based (RAG) querying, speech interaction, authentication, and an interactive avatar interface using Next.js, TypeScript, and Supabase.

Semiconductor Test Analytics — *Python, SQL, Pandas, Streamlit*

- Built a data pipeline and interactive Streamlit dashboard to validate synthetic semiconductor test data, analyzing wafer/lot yield trends and the impact of simulated leakage-current drift and temperature variation on device failure rates.

LEADERSHIP & ACTIVITIES

- **Member - Robotics, Computer Science & Engineering Clubs:** Participate in technical workshops, project collaboration, peer learning, and hands-on engineering activities.
- **Mentor - Volunteer Teacher, Junior Youth Spiritual Empowerment Program (JYSEP):** Mentored junior youth through a structured curriculum and supported collaborative learning.

TECHNICAL SKILLS

Programming: Python, C, C++, Java, JavaScript, SQL, HTML/CSS

AI/ML & Data: scikit-learn, NumPy, Pandas, Matplotlib, predictive modeling, feature engineering, data cleaning & analysis

Software & Web: React, Node.js, REST APIs, responsive development, Git/GitHub

Systems & Automation: sensor-data processing, predictive maintenance, workflow automation, hardware-software integration

Tools: VS Code, Vercel, Netlify, ReportLab, Google Analytics, SEO tooling
